Field Checklist of The Birds of Arizona

This checklist contains 562 species of birds that have been accepted by the Arizona Bird Committee as of October 2018. An additional 70 subspecies that occur in Arizona and are identifiable have been included. Identifiable forms and groups, and their common names are derived from eBird Taxonomy, available online at: <http://ebird.org/>

The species list conforms to the American Ornithologists' Society (AOS), checklist order and nomenclature as of the 59th supplement published June 27, 2018.

Checklist annotations:

- n** = Has bred in Arizona (342 taxa). A species that has hatched young at least once, however, this does not include hybrid offspring.
- [] = Species in brackets have not been physically documented in Arizona (2 species)
- *
- # = Arizona Bird Committee review species (160 taxa)
- # = Sketch details species (76 taxa)
- italics** = Species in *italics* are identifiable subspecific forms (70)
- (int)** = Introduced (8 species)
- (ex)** = Extirpated (4 species) previously bred or presumed to have bred in Arizona, but no longer occur naturally. They may have been reintroduced but remain unestablished.

Species or subspecies marked with an asterisk or pound sign (*, #) should be documented with photographs and or written details. Reports of Arizona Bird Committee review species (*) may be submitted online to the Arizona Bird Committee at the Arizona Field Ornithologists Website at : www.azfo.org.
